

Organized by:

Institute of Environmental Science and Engineering, Hanoi University of Civil Engineering (HUCE),
Research Center for Water Environment Technology, The University of Tokyo (UT),
Southeast Asian Center for Water Environment Technology, Asian Institute of Technology (AIT) & UT.

Co-organized by:

Global COE program at University of Yamanashi (UY), supported by MEXT
Asian Program for Incubation of Environmental Leaders, The University of Tokyo (APIEL), supported by JST
Core Research for Evolutional Science & Technology (CREST), supported by JST
UASB - DHS Integrated System — A Sustainable Sewage Treatment Technology(D*-STAR), supported by JST-JICA, SATREPS
Graduate Program in Sustainability Science - Global Leadership Initiative: GPSS-GLI

Program committee:

Prof. Hiroaki Furumai (UT)
Dr Hiroyuki Katayama (UT)
Dr Tran Thi Viet Nga (HUCE)
Dr Kei Nishida (UY)
Dr Kyoung-Jin AN (APIEL)
Dr Kengo Kubota (Tohoku U)
Dr Ikuro Kasuga(UT)
Prof. C. Visvanathan (AIT)
Dr. Suraphong Wattanachira Chiang Mai University
Prof. Tjandra Setiadi Institut Teknologi Bandung
Dr Udomphon Puetpaiboon, Prince of Songkla University
Dr Chart Chiemchaisri Kasetsart University

Organizing committee:

Dr Tran Thi Viet Nga (HUCE)
Prof. Hiroaki Furumai (UT)
Dr Hiroyuki Katayama (UT)
Prof. Tran Duc Ha (HUCE)
Prof. Nguyen Viet Anh (HUCE)

First Announcement

The 10th International Symposium on Southeast Asian Water Environment, Hanoi, Viet Nam November 8-10, 2012

Invitation

A series of international symposia on Southeast Asian Water Environment has been successfully organized since 2003. These symposia attracted numbers of researchers, policy makers, NGO workers and graduate students in the world, where the participants exchanged impressive and invaluable body of knowledge concerning environmental issues on water in Southeast Asia.

We are pleased to announce the Tenth International Symposium on Southeast Asian Water Environment, scheduled to be held at Hanoi, Vietnam from 8 to 10 November 2012. This symposium is organized by Research Center for Water Environment Technology (RECWET) in the University of Tokyo (UT) and Southeast Asian Center for Water Environment Technology (SACWET) in Asian Institute of Technology (AIT), in cooperation with the Hanoi University of Civil Engineering (HUCE). Cooperation with several relevant research projects is scheduled so that this event could become more attractive with a lot of integrated idea and hot information.

The purpose of this Symposium is to provide a forum for discussion and exchange among researchers/practitioners in Environmental Technology and Management and related areas from the Asian Region and to promote interaction among researchers from Asia-Pacific countries, Japan and other parts of the world. In addition, an interesting technical tour is specially planned by HUCE on the first day of symposium, which is expected to promote intercommunion among participants as well as introduction of local situation of water environment management.

We do hope that, through the Symposium, a strong network or partnership with active local agents will be established, and our colleagues in Southeast Asia will learn more from the experts of other countries to manage the water environment of the region. From the Seventh symposium, the Award for Asian Young Professional on Water Research was initiated with a support from the Ohgaki Scholarship fund. The Award is given to distinguished young professionals who demonstrate the most outstanding and promising performance in the symposium, and will be invited to the next symposium.

On behalf of the Symposium organizing committee, we would like to invite interested researchers/experts to send their contributions/papers to the Symposium and actively disseminate this announcement to potentially interested people/organization.

Prof. Hiroaki Furumai
RECWET, University of Tokyo

Call for Paper

The following specific subjects related to Asian water environment, especially in Southeast Asia, are selected as the topics.

Water environmental issues and sustainability
Climate change and water environment
Flood issues in Urban Environment
Appropriate technologies
Groundwater issues
Water and Wastewater treatment
Water reuse technologies
Health-related water microbiology
Water quality monitoring and modeling
Water and aquatic resource management
Challenges in environmental education
Public participation and involvement

Other topics related water environment are also welcome. Participation from Industrial sectors or NGO/NPO is also welcome.

Manuscripts for platform and poster presentations should be prepared according to the format specified at:

http://www.recwet.t.u-tokyo.ac.jp/asian_water2012/For_Presenters.html

Papers for platform presentations should be submitted via e-mail to: asiasympo2012@env.t.u-tokyo.ac.jp by Aug 3, 2012. All applicants will receive an acknowledgment via e-mail upon submission of the manuscript. The corresponding author will be informed of the result of the review by early September. Papers for the poster presentations should be submitted to the e-mail address above by September 20, 2012.
